The Oracle CPQ Cloud Release 18A Patch 1 document provides a high-level description of the bug fixes included in this update. This document also provides information on supported and certified browsers. For more information on Release 18A features, please see the Release 18A What's New document.

HOT FIXES

Bug ID	Description	Resolution
BML		
27662392	Beginning in 18A, the addpartstotransaction() BML function returned errors for existing parts when the BML function contained part numbers with upper case characters.	The addpartstotransaction() BML function no longer returns errors the BML function contains part numbers with upper case characters.
Commerce		
27700361	Some customers experienced excessive processing times when attempting to copy multiple line items in Release 18A.	Customers no longer experience excessive processing times when copying multiple line items.
Integration		
27717652	Beginning in 2017 R1, External Configuration Save actions generated "NullPointerException" errors when a Product Family "Client_side" Integration Type was enabled.	External Configuration Save actions function as expected when a Product Family "Client_side" Integration Type is enabled.
27740562	Beginning in 2017 R1, when a REST API call to invoke an External Configuration Save action failed, the resulting error appeared in subsequent successful REST API call responses.	Errors from previous REST API call failures no longer appear in subsequent successful REST API call responses.
27747081	Beginning in 18A, External Configurators received a "NullPointerException" error when a config_extra_info value contained JSON data.	External Configurations functions as expected when a config_extra_info value contained JSON data or a string value.
Users, Groups, and Partner Organizations		
27639538	Beginning in 2017 R1, when "Enable Mobile Layouts" was set to "Limited" administrators could not enable the user "Mobile Enabled" setting using the CPQ UI. The "Mobile Enabled" setting could be enabled by using a Bulk Upload to update users or a Web Service call to update the user.	Administrators can now use the CPQ UI to enable the user "Mobile Enabled" setting when "Enable Mobile Layouts" is set to "Limited".

BROWSER SUPPORT

CPQ Cloud supports all browser versions that meet the criteria of the Oracle Software Web Browser Support Policy.

SUPPORTED BROWSERS

Windows

- Major releases of Google Chrome upon general browser availability and until Google no longer supports the version
- Major releases of Mozilla Firefox upon general browser availability and until Mozilla no longer supports the version
- Major releases of Internet Explorer/Microsoft Edge within nine months of general browser availability and until Microsoft no longer supports the version

Mac OS X

- Major releases of Google Chrome upon general browser availability and until Google no longer supports the browser version
- Major releases of Mozilla Firefox upon general browser availability and until Mozilla no longer supports the version
- Major releases of Safari within nine months of general browser availability and until Apple no longer supports the version

iOS

- Major releases of Safari within nine months of general browser availability and until Apple no longer supports the browser version

If you experience issues using a supported browser version, open a ticket on [My Oracle Support](#) to resolve the issue. If an issue arises when using a supported browser, use a certified browser version until a fix is delivered. Certified browsers are selected based on current market share and are thoroughly tested to work with the current version's standard functionality.

CERTIFIED BROWSERS

Windows

- Google Chrome 62.x
- Mozilla Firefox 56.x
- Internet Explorer 11.x

NOTE: Compatibility issues with the selected browsers may exist when sites are created with additional JavaScript, alternate CSS, or other custom functionality. Customizations may require add-on work. Contact [My Oracle Support](#) to determine the availability of workarounds and minor fixes.

TRAINING

To see all new functionality and known issues between your current version and the version to which you are upgrading, refer to the What's New documents. To familiarize yourself with the new features introduced in Oracle CPQ Cloud Release 18A, Oracle strongly recommends referring to the CPQ Online Help. For additional assistance, please see [My Oracle Support](#). Verify any information not explicitly mentioned in the release notes as supported by the software against the CPQ Online Help or with the Oracle CPQ Cloud Consulting team.

DISCLAIMER

This Release 18A Patch 1 document contains high-level information and does not function as a specification or replace the Product Help or User Guide. Upgrading to a subsequent release may require modifications to integration XML or APIs or the re-deployment of Commerce Processes, Configurations, or global function settings.

MIGRATION

When migrating from one site to another using the Migration Center or Migration Packages, both sites must use the same major release. The migration of content can only occur across minor releases within the same major release. Migration across major releases cannot occur.

- “Major release” = A major product release, e.g. Release 18A
- “Minor release” = A release update, e.g. Release 18A Patch 1

NOTE: Bug ID numbers correspond to Oracle BugDB numbers.
