<i>Disclaimer</i>	<i>3</i>
<i>Migration</i>	<i>3</i>

The Oracle CPQ Cloud Release 18D Patch 2 document provides a high-level description of the bug fixes included in this update. This document also provides information on supported and certified browsers. For more information on Release 18D features, please see the Release 18D What's New document.

HOT FIXES

Bug ID	Description	Resolution
Assets		
29338124	When using Asset-based ordering (ABO) in a multi-node site with BOM parts, modifying assets sometimes resulted in an error.	When using Asset-based ordering (ABO) in a multi-node site with BOM parts, modifying assets works as expected.
Commerce		
29025412	When using System Configuration in the JET Transaction User Interface, Line Item Grid rows displayed as misaligned for nested hierarchies.	When using System Configuration in the JET Transaction User Interface, Line Item Grid rows display nested hierarchies appropriately with aligned indentation.
29337534	In the initial release of 18D, an extra argument (Dictionary headers) was added to <code>urldatabyget()</code> that caused existing BML functions to fail when the optional timeout parameter was included.	The <code>urldatabyget()</code> is updated to include the new argument (Dictionary headers) at the end of the BML string, as follows: <i>String urldatabyget(String url, String parameters, String defaultValue, [Integer timeout, [Dictionary headers]])</i>
29338168	Returns from <code>urldata</code> functions included extra non-display characters.	Extra non-display characters have been removed from <code>urldataby</code> function returns.
29363433	When performing an action which caused a step transition, step transition notification email which contained an attachment was not received by the intended recipient.	When performing an action which causes a step transition, step transition notification email which contain an attachment is received by the intended recipient.
Configuration		
29311380	When a BOM item definition was defined as 0.0 in the BOM Definition Table, the BOM Item price displayed as "On Request" on the Configuration page.	When a BOM item definition is defined as 0.0 in the BOM Definition Table, the BOM Item price displays the value defined in the Parts Data Table.

BROWSER SUPPORT

CPQ Cloud supports all browser versions that meet the criteria of the Oracle Software Web Browser Support Policy.

SUPPORTED BROWSERS

Windows

- Major releases of Google Chrome upon general browser availability and until Google no longer supports the version
- Major releases of Mozilla Firefox upon general browser availability and until Mozilla no longer supports the version
- Major releases of Internet Explorer/Microsoft Edge within nine months of general browser availability and until Microsoft no longer supports the version

Mac OS X

- Major releases of Google Chrome upon general browser availability and until Google no longer supports the browser version
- Major releases of Mozilla Firefox upon general browser availability and until Mozilla no longer supports the version
- Major releases of Safari within nine months of general browser availability and until Apple no longer supports the version

iOS

- Major releases of Safari within nine months of general browser availability and until Apple no longer supports the browser version

If you experience issues using a supported browser version, open a ticket on [My Oracle Support](#) to resolve the issue. If an issue arises when using a supported browser, use a certified browser version until a fix is delivered. Certified browsers are selected based on current market share and are thoroughly tested to work with the current version's standard functionality.

CERTIFIED BROWSERS

Windows

- Google Chrome 68.x
- Mozilla Firefox 61.x
- Internet Explorer 11.x

NOTE: Compatibility issues with the selected browsers may exist when sites are created with additional JavaScript, alternate CSS, or other custom functionality. Customizations may require add-on work. Contact [My Oracle Support](#) to determine the availability of workarounds and minor fixes.

TRAINING

To see all new functionality and known issues between your current version and the version to which you are upgrading, refer to the What's New documents. To familiarize yourself with the new features introduced in Oracle CPQ Cloud Release 18D, Oracle strongly recommends referring to the CPQ Cloud Online Help. For additional assistance, please see [My Oracle Support](#). Verify any information not explicitly mentioned in the release notes as supported by the software against the CPQ Cloud Online Help or with the Oracle CPQ Cloud Consulting team.

DISCLAIMER

This Release 18D Patch 2 document contains high-level information and does not function as a specification or replace the Product Help or User Guide. Upgrading to a subsequent release may require modifications to integration XML or APIs or the re-deployment of Commerce Processes, Configurations, or global function settings.

MIGRATION

When migrating from one site to another using the Migration Center or Migration Packages, both sites must use the same major release. The migration of content can only occur across minor releases within the same major release. Migration across major releases cannot occur.

- “Major release” = A major product release, e.g. Release 18D
- “Minor release” = A release update, e.g. Release 18D Patch 2

NOTE: Bug ID numbers correspond to Oracle BugDB numbers.
