The Oracle CPQ Cloud 2015 R2 Update 5 document provides a high-level description of the bug fixes included in this update. This document also provides information on supported and certified browsers. For more information on 2015 R2 features, please see the 2015 R2 What's New document.

Hotfixes

Bug ID	Description	Resolution
Commerce		
23093624	In 2015 R2, the Restricted Access company type was no longer available in invocation rules, step views, access to new transaction action, and restricting access to Commerce data columns.	The Restricted Access company type is now available in invocation rules, step views, access to new transaction action, and restricting access to Commerce data columns.
23033083	After typing in the Part Number field and making a selection from the Quick Key search results in a Commerce transaction, an error displayed in CPQ Cloud 2015 R2 when users quickly shifted focus and clicked away. The added part was marked invalid.	Users can now add a part selected from the Quick Key search results to a Commerce transaction even after shifting focus and clicking away.
22992782	When granularly migrating Commerce actions, attributes, or rules and printer-friendly XSL files are listed as dependencies but not selected as part of the migration, the printer-friendly XSL files were unintentionally migrated in 2015 R2.	Printer-friendly XSL files are no longer unintentionally migrated when granularly migrating Commerce actions, attributes, or rules and the XSL files are listed as dependencies but not selected as part of the migration.
20206958	When copied from other sources, hidden control characters sometimes resulted in a corrupt and inaccessible quote document once a modify action was performed in 2015 R2.	An error message now displays when a modify action is performed and prevents the saving of invalid characters in the database.
22007764	When the display mode was set to Variable in 2015 R1, administrators could not open the Function edit box to edit a function in a formula.	The Display Mode no longer affects administrators' ability to edit functions in the formula.
Salesforce		
21968993	In 2015 R2, a Salesforce user could not view two CPQ Cloud quotes in two different tabs of the same browser window when a CPQ site was integrated with Salesforce using v5.0 of the Salesforce Commerce Integration Managed Package. The system would start a new CPQ Cloud session for each quote.	A Salesforce user can now view multiple CPQ Cloud quotes in different tabs of the same browser window when their CPQ site is integrated with Salesforce.

Document Designer		
22933661	When previewing, deploying, or trying to view the page XSL for large Document Designer documents taking a long time to load, an error message displayed and the browser timed out in 2015 R1 and 2015 R2.	The preview, deploy, and view page XSL actions were further optimized for large Document Designer documents.
General		
23011952	When the Save or Back action was performed on the Partner Information page of a buy-access user profile in 2015 R2, the associated user was changed to a Full Access user.	Performing the Save and Back actions on the Partner Information page of a buy-access user profile no longer changes the associated user to a Full Access user.

Browser Support

CPQ Cloud supports all browser versions that meet the criteria of the Oracle Software Web Browser Support Policy.

Supported Browsers

Windows

- Major releases of **Google Chrome** upon general browser availability and until Google no longer supports the version
- Major releases of **Mozilla Firefox** upon general browser availability and until Mozilla no longer supports the version
- Major releases of **Internet Explorer/Microsoft Edge** within nine months of general browser availability and until Microsoft no longer supports the version

Mac OS X

- Major releases of **Google Chrome** upon general browser availability and until Google no longer supports the browser version
- Major releases of **Mozilla Firefox** upon general browser availability and until Mozilla no longer supports the browser version
- Major releases of **Safari** within nine months of general browser availability and until Apple no longer supports the browser version

Android

- Major releases of **Google Chrome** upon general browser availability and until Google no longer supports the browser version

iOS

- Major releases of **Safari** within nine months of general browser availability and until Apple no longer supports the browser version

If you experience issues using a supported browser version, open a ticket on [My Oracle Support](#) to resolve the issue. If an issue does arise when using a supported browser, use a certified browser version until a fix is delivered. Certified browsers are selected based on current market share and are thoroughly tested to work with the current version's standard functionality.

Certified Browsers

Windows

- Google Chrome 47.x
- Mozilla Firefox 41.x
- Internet Explorer 11

Mac OS X

- Google Chrome 47.x
- Mozilla Firefox 41.x

Android

- *Operating System:* 4.4 Kit Kat
- *Browser:* Google Chrome 47.x
- *Screen resolution:* 2560 x 1600

iOS

- *Operating System:* iOS 9.x
- *Browser:* Safari 9.x
- *Screen resolution:* 2048 x 1536

Note: Compatibility issues with the supported browsers may exist when sites are created with additional JavaScript, alternate CSS, or other custom functionality. Customizations may require add-on work. Contact Customer Support to determine the availability of workarounds and minor fixes.

Training

To see all new functionality and known issues for the versions between your current version and the version to which you are upgrading, refer to the What's New document.

To familiarize yourself with the new features introduced in Oracle CPQ Cloud 2015 R2, Oracle strongly recommends referring to the Online Help documentation. For additional assistance, please see [My Oracle Support](#).

Verify any information not explicitly mentioned in the release notes as supported by the software against the Oracle CPQ Cloud 2015 R2 Product Help or with the Oracle CPQ Cloud Consulting team.

Disclaimer

This 2015 R2 Update 5 document is provided for high-level informational purposes only and is not intended to function as a specification or to replace the Product Help or User Guide. Upgrading to a subsequent release may require modifications to integration XML or APIs or the re-deployment of Commerce Processes, Configurations, or global function settings.

Migration

When migrating from one site to another using the Migration Center, both sites must be on the same major release. The migration of content can only occur across minor releases with the same major release.

Migration across major releases cannot occur.

- “Major release” = A major product release, e.g. 2015 R2
- “Minor release” = A release update, e.g. 2015 R2 Update 5

Note: Bug ID numbers correspond to Oracle BugDB numbers.
